2020 COLLECTION

Metropol

design by Sebastian Herkner

SEBASTIAN HERKNER

Sebastian Herkner established his design studio in Offenbach, Germany in 2006. Since that time, he has designed furniture, lighting and products for brands all around the world. Sebastian's design ethos is driven by quality and function as well as tradition and innovation. His designs are very personal, developed using intuition and instinct, working with brands who share his vision and responsibility for products.

Named Maison & Objet's 2019 Designer of the Year, Sebastian's works have won numerous accolades – among others the IF Award, the Iconic Award and the Elle Deco International Design Award (EDIDA).

Indre

design by Nikolai Kotlarczyk

NIKOLAI KOTLARCZYK

The studio of Nikolai Kotlarczyk extends across interior product design - from decorative pieces to more industrial focused work. What unites his work is a geometric sensibility based around the design elements of symmetry and balance, along with references to historical and geographical ingredients – most predominately architectural. Aiming to simplify and present these references in a contemporary way, his work often contains a sense of nostalgia within a style that is refined yet decorative. His studio approaches the importance of sustainability in contemporary design through a combination of quality craftsmanship, durable natural materials, and a unique design language to create work that does not contribute to a throw-away culture.

Rakumba

For more than 50 years Rakumba has been designing and manufacturing decorative and bespoke lighting. We are proud to be Australia’s longest established international lighting brand, bringing heritage, authenticity and technological innovation to the collections we produce.

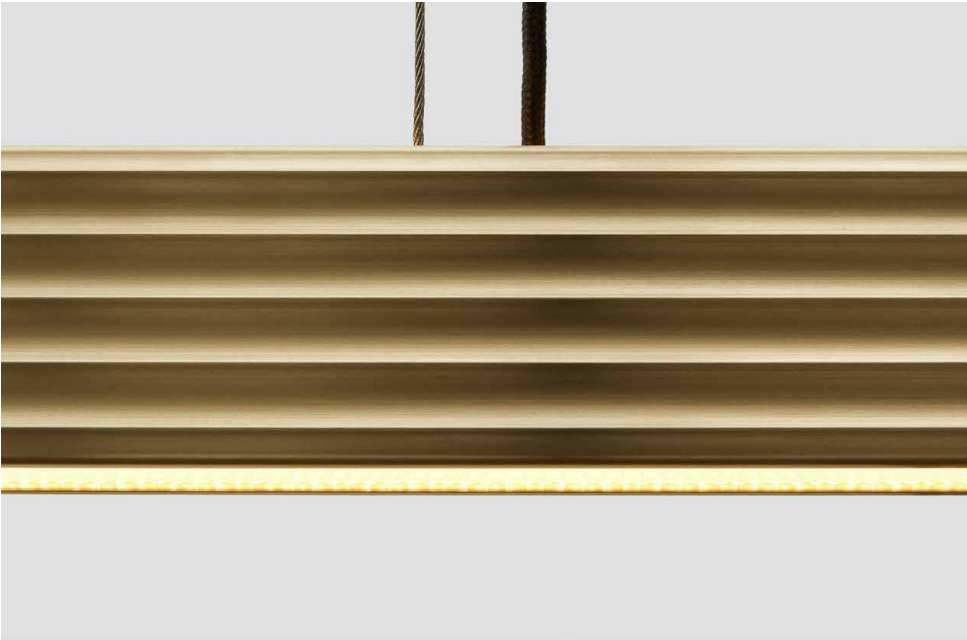

As designers and problem solvers, our mission of “making beauty” and our relentless pursuit of perfection pushes us beyond the boundaries of possibility, to explore the creative unknown. Through our collaborations with local and international designers, we bring together contemporary design, artisan craft, complex manufacturing and leading - edge technology to execute lighting with effortless complexity. A legacy of light that is truly exciting to us.

CILON

A NEW LANGUAGE IN DECORATIVE LIGHTING

Mix and match to create endless expressions

Rail System | 7 Luminaires | Flexibly positioned
Individually controlled | Infinite combinations
Pendant | Chandelier | Wall | Floor

Studio Truly Truly and Rakumba have designed a lighting system of exceptional flexibility and purity of form. The system is inspired by the way characters form words, and how these can be arranged in relationships to create a language of expression.

Typography’s first collection, CILON, consists of seven different lighting fixtures, or characters. Each light can be positioned on four sides of the central axis and can be controlled independently of any other.

Over time lights can be moved to new positions, or new lights and rails can be added. The design possibilities are almost limitless, delivering technically complex performance in a seemingly effortless way.
