Permanent Collection

# Small Transparent Speaker

This smaller Transparent Speaker has a surprisingly big sound. It has a warm and deep bass, clear mids and crisp details in the high frequencies. Can be used as a single or double wireless setup.

## Technical Specifications

Materials: Tempered glass and aluminium  
Wireless: Bluetooth 5  
Dimensions: 268/203/95 mm  
Weight: 3 kg  
Acoustic Volume: 3 l  
Output power: 30 W  
Frequency Response: 60 Hz - 20 kHz  $\pm 3$  dB

# Our approach to technology

Tech changes fast these days. We believe products should be able to improve at home in stead of being thrown away.

Our products currently come with the latest Bluetooth protocol, but they are built to be upgraded over time.

They can also be equipped with Wifi modules for multi-room or even voice control usage. Modules can be concealed and powered in the bottom/rear compartment.

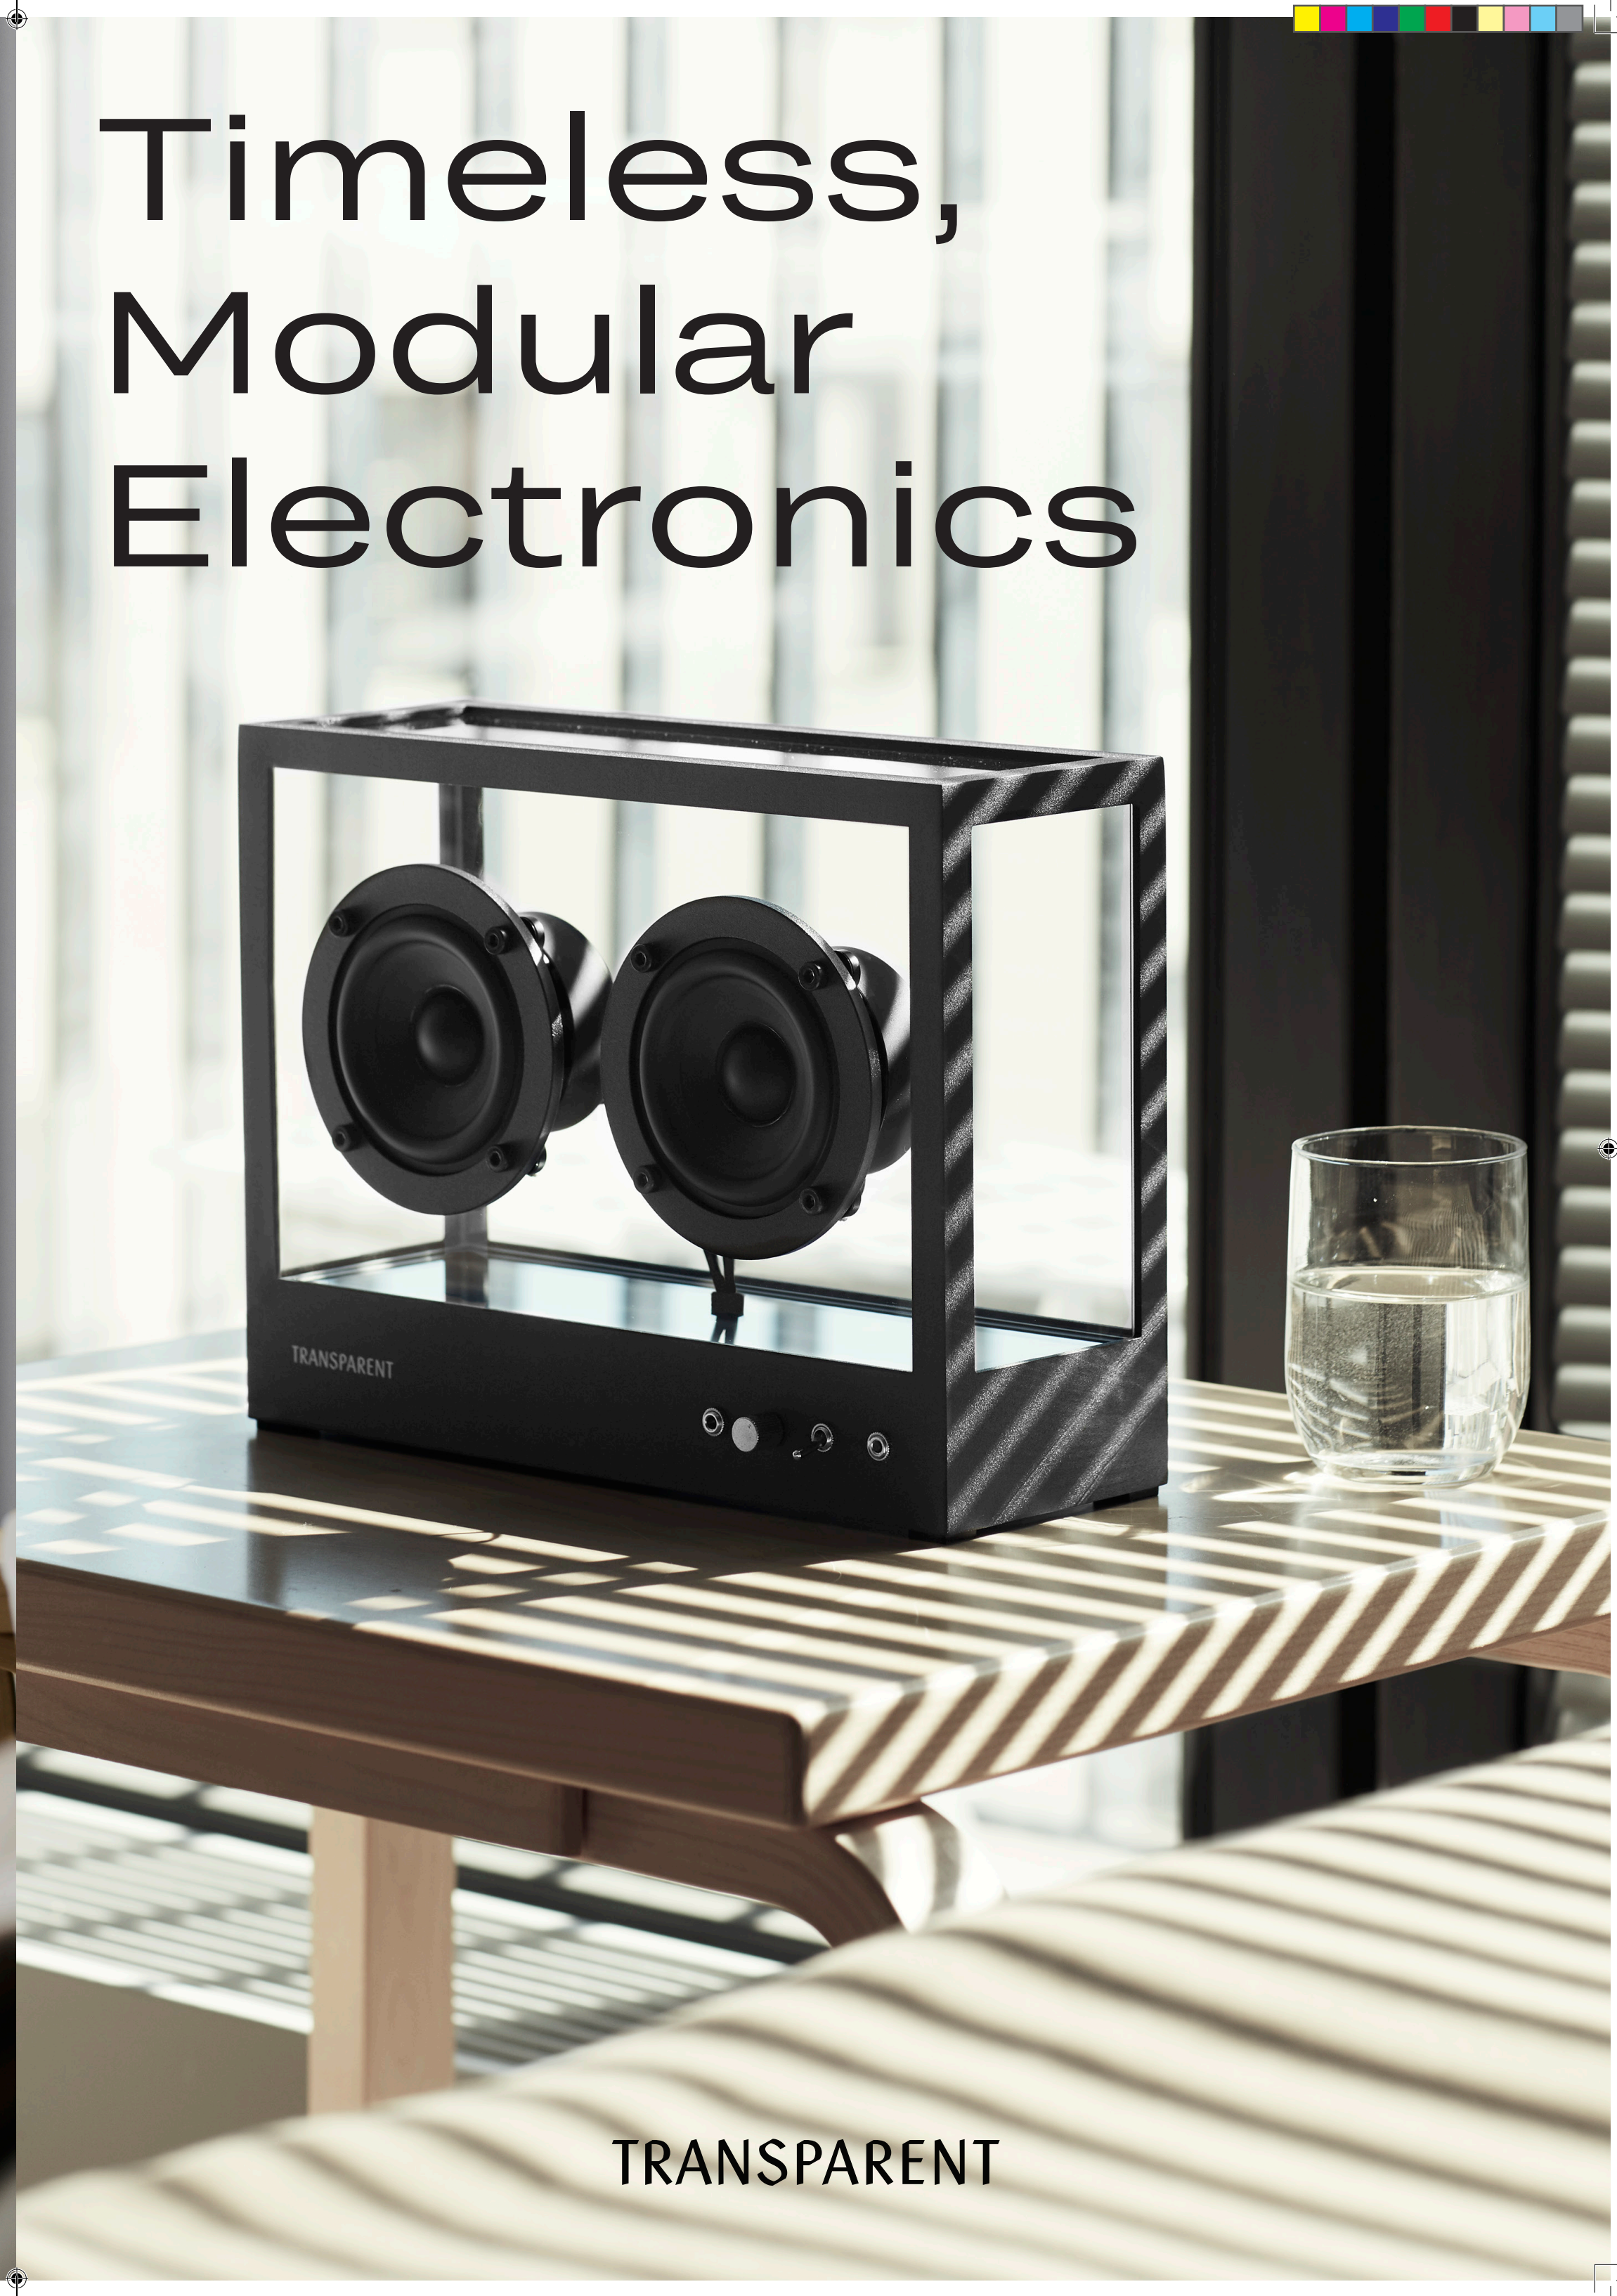

The only thing needed to play music is a press of a button to connect, simple as that.
